

# Setting up your e-mail account on Android Phone

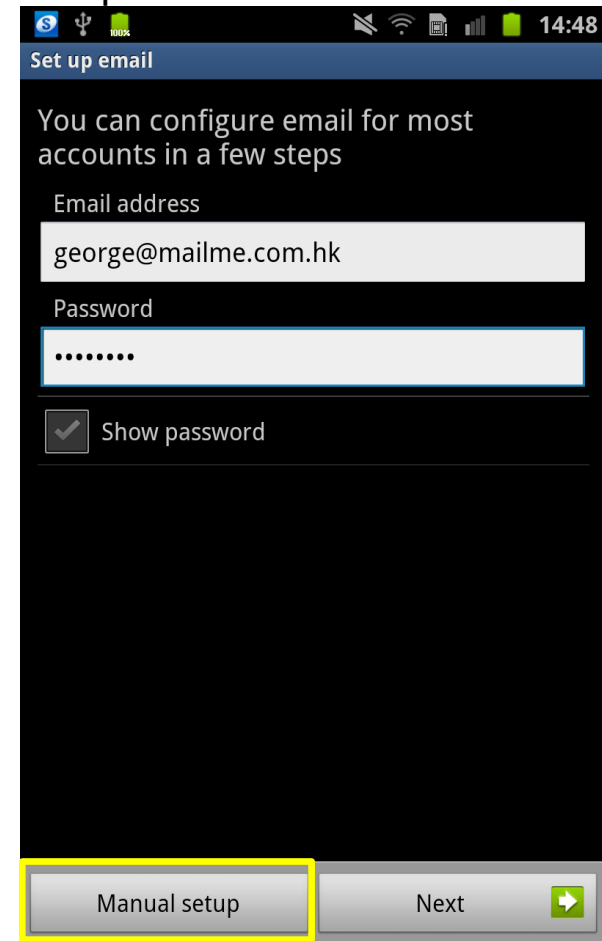

Step 1: Tap on Applications

Step 2: Look for Email

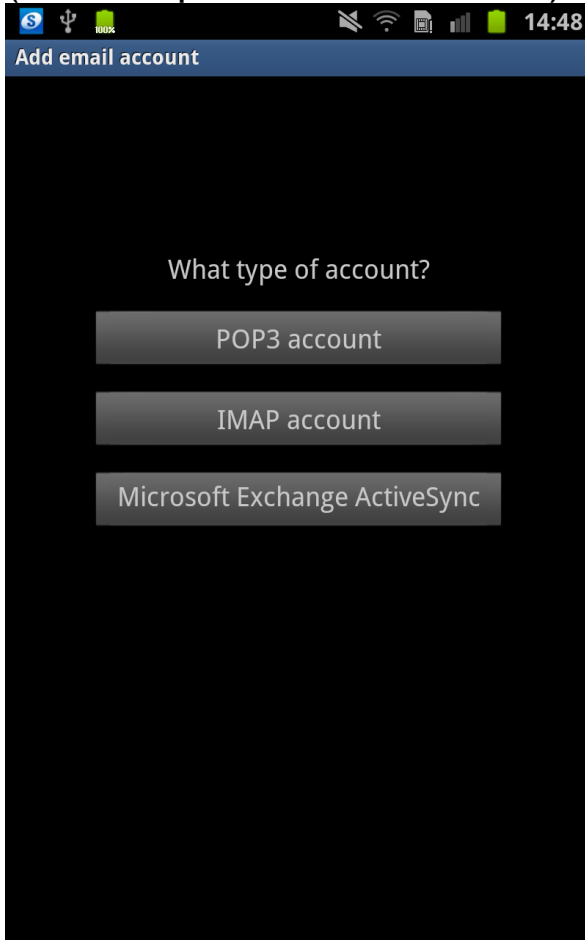

Step 3: After the Email App start, Enter your email address and password then tap Manual setup

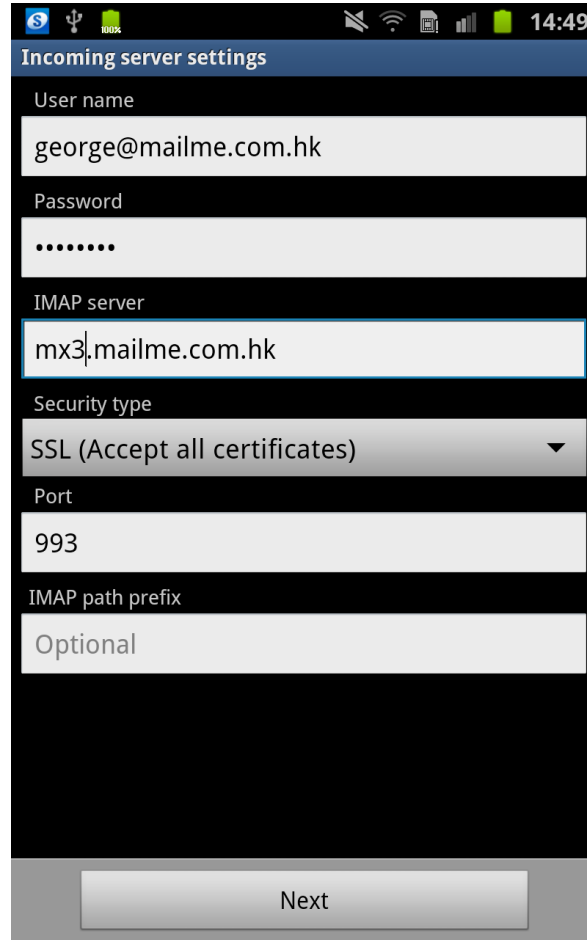

Step 4: Choose the Account Type “IMAP” or “POP3”

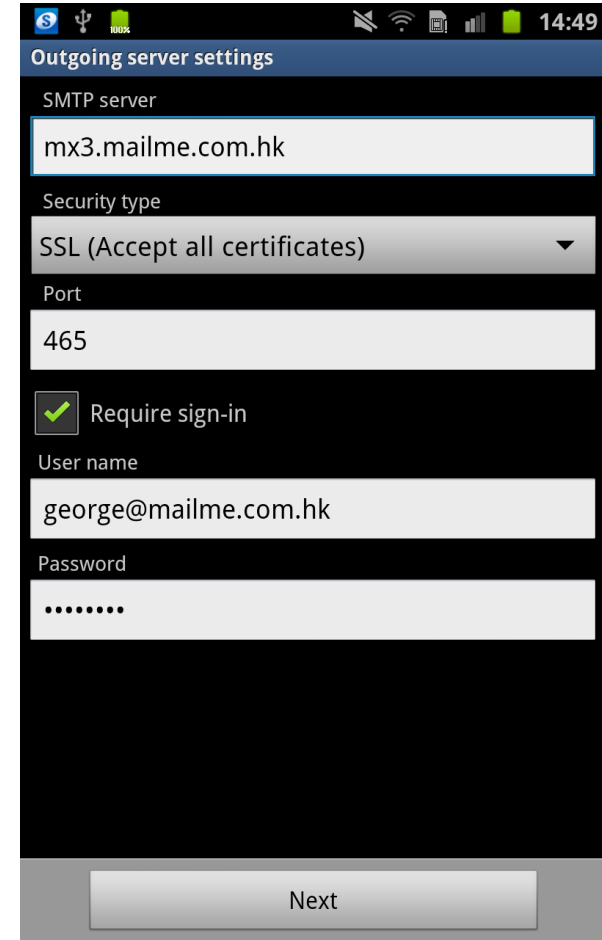

(IMAP is preferred for mobile)

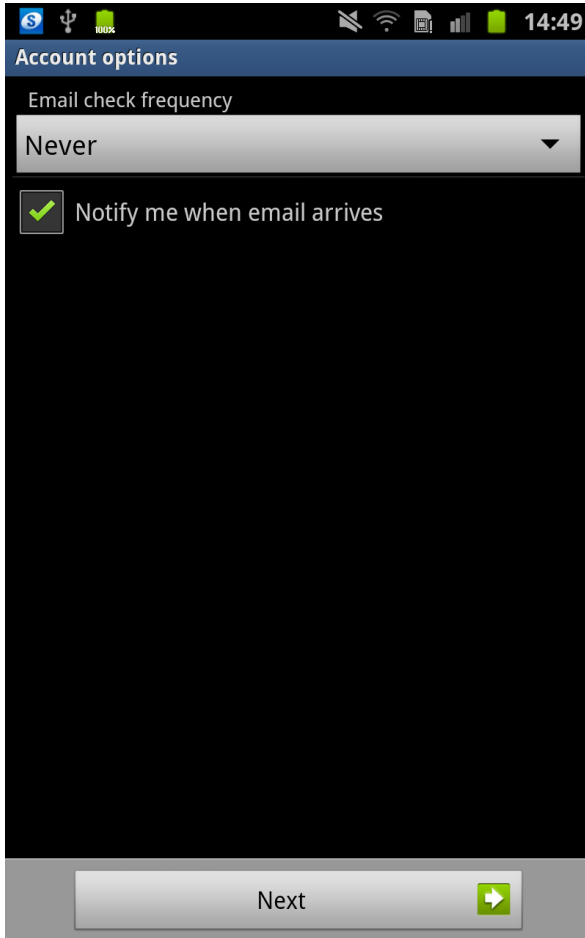

Step 5: Enter your Email and password, Enter “mx3.mailme.com.hk” as IMAP server and enable SSL

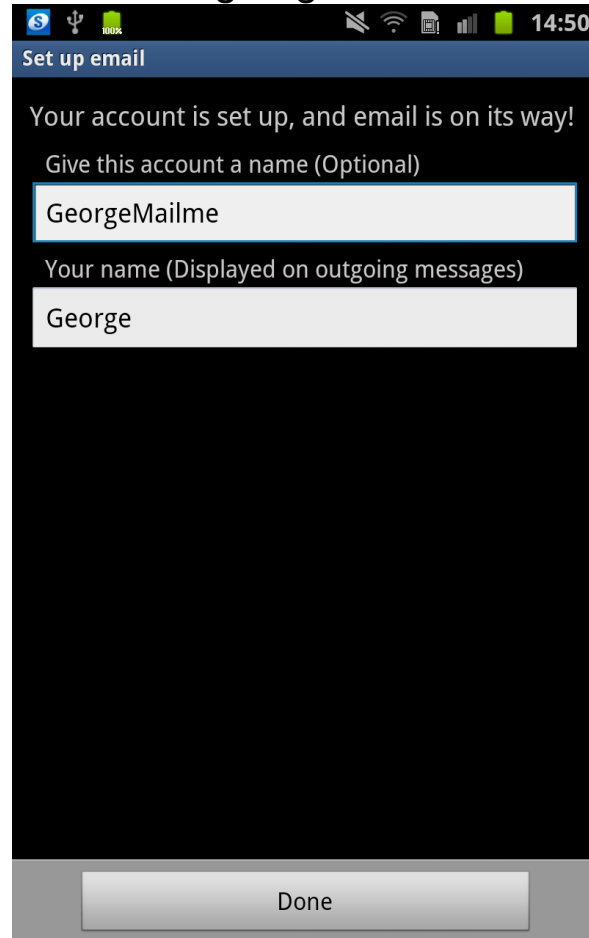

Step 6 Enter “mx3.mailme.com.hk” as SMTP server and enable SSL, leave other as default value

Step 8: You can set Email check frequency as how often Email app will try to fetch mail from server

Step 8: Finally, define and account display name for the ease of identifying different account and the sender name use for outgoing email

Step 9: You should see your email with no time. Note that, it may take a little longer to fetch data for the first time.
